1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-12, 14-18, 27-39, 41-46 and 83-88, drawn to a method of making a product, classified in class 264, subclass 279.
- II. Claims 13, 19-26, 40, 47-82 and 89 drawn to a product, classified in class 428, subclass 34.1.

The inventions are distinct, each from the other because:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by other processes such as by molding a product with a slot into which the insert is solvent welded. Also, the product can be made by casting around an insert and would not require a molding assembly, per se—ie, the casting would be done by hand.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
